- . 1 x Schultz Kraft SK-6000-SE Power Sequencer

Media Room (25sqm)

"Needle In A Haystack"... we all know what that idiom means, probably even more so for Committee Members of The Amaryllis Ville Condominium when searching for a new set of audio-visual equipment to replace their existing ones in the media room due for minor renovation works – sometime in late 2018 – setting the team in a **race-against-time-and-budget-constraint** expedition to find **that perfect** set of **space-saving entertainment equipment** with **Karaoke, Music, Movies** and **Gaming** features. Countless of quotations and demo sessions by various vendors and a unified decision later, **the team** finally **found IT** with Thunderstone Technology's **Ka:Mo:Ga* AV Receiver/DSP 7.1 Surround Sound System** and the Karaoke-On-Demand device, **K-Bubbles Cloud CS**.

The new revamped Media Room now has an **All-in-One** Entertainment System to suit their residents' **Karaoke, Music, Movies** and **Gaming** needs:

* **Karaoke:Movies:Gaming** – KA:MO:GA Emic 7.1 Surround Sound Audio-Visual Receiver w/ Built-in Digital Sound Processor that packs a powerful and thunderous punch in the 7 petite satellite speakers and a subwoofer; SK-6000-SE Power Sequencer to turn individual inputs in timer modes; all these housed in a protective 1-Touch (Turns It All) Button 9U Rack Unit.

Stunning Interface

- Simple yet elegantly designed user interface that fits well on your iPad/Touch Screen/TV
- A one-page design layout allows you to navigate at one glance

Quick Search Bar

- Just one-step to finding your song... simply enter the artist's name or song title in the quick search bar and... voila – result/s would be shown immediately
- What's more, we have designed it both ways be it acronyms or full-spelling for example, filling in Lady Gaga or LG in the quick search bar will generate all of her songs for you to select

Control Panel

- Adjust your favourite song/s to the volume/s that best suits your preference and you won't ever need to adjust them again for each play
- Edit the analogue settings immediately for any incorrect songs and have it saved permanently

Built-in Digital Processor

- Digital presets to enhance your vocals for that awesome singing experience
- Experience the full key control experience with various vocal effects all at one place

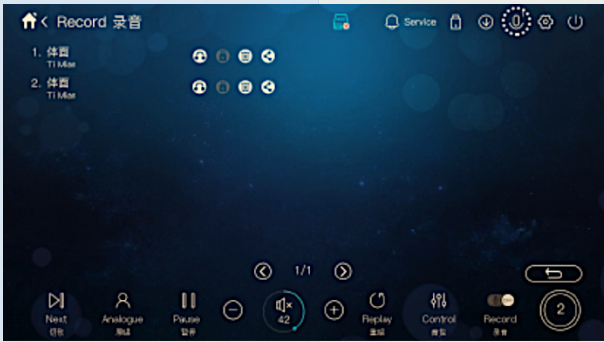

Fluid Robust Keyboard

- Redesigned to allow you to filter via Language & Word Count to launch different dialect keyboard settings for songs search
- Bullets to Insert, Preview and Add to Favourite List with one touch

Dual Language

- New Dual-language English and Your Native language just added to the interface
- Languages available in Chinese, Indonesian, Malay, Korean, Japanese and more

Record-N-Save

- The all new Karaoke-on-Demand K Bubbles Cloud CS lets you record your singing and save it indefinitely
- Record your voice; playback anytime or share it with your friends via Whatsapp/Facebook and more (still in the works)

Play Your Own Content

- The all new Karaoke-on-Demand K Bubbles Cloud CS lets you record your singing and save it indefinitely
- Record your voice; playback anytime or share it with your friends via Whatsapp/Facebook and more (still in the works)
- Easy toggle between analogue and digital if your other karaoke videos come in dual track

Cloud Connectivity

- Software updates for improvements/enhancements
- Real-time Database Cloud Synchronization
- Create and store your favourite playlist via Cloud

Feedback & Request Channel

- An integrated channel designed to allow you to conveniently send us your feedbacks/requests via the touch screen/iPad

Mika 21.5" Capacitive touch screen

Bezeless, ultra-sensitive touch sensors
